Subject: RE: Location of Nearest Hyperbaric Facility

Hope that this e-mail arrives intact. Look below your e-mail for a list of hyperbaric facilities. I included all the ones in Eastern Canada. I found these on a website. If this does not work, let me know. Can you receive FAX? Did the Navy diver show up? Are you diving to remove the cable from the shaft? I will be out of the office until Monday 10 April.

Stay safe,

Subject: Location of Nearest Hyperbaric Facility

We are scheduled to conduct a dive in the ice on wednesday. If possible, can you research the location of the nearest Hyperbaric Facility. This information will be especially important for our pre-accident planning. We will be operating just north of the Strait of Belle Isle, between Northern Quebec and Northern Newfoundland. If possible if you could provide the nearest facility and their phone number (we used to have a book listing facilities worldwide when I was on the Sea and Star, but Healy doesn't have one yet). Appreciate all the assistance. I'll write more soon.  
Regards,

Canadian Dive Accident Facilities
